

Program Development Resources – Drug and Alcohol Prevention

Drug and Alcohol Prevention Programs inform workers of the dangers posed by drug and alcohol use and abuse at work. These programs offer help to workers with drug and alcohol problems. They also cut the number of drug- and alcohol-related accidents in the workplace.

Look below for links to model programs and other resources you can use to develop your Workplace Safety and Loss Prevention Incentive Program. They can help you build a program to meet the needs of your business or group. Any program you create must meet the requirements of ICR 60 to qualify for an incentive credit. Simply adopting one of these model programs will not meet all requirements.

United States Department of Labor *Drug-Free Workplace Policy Builder*:
